Real science. Real fun!

The Saskatchewan Science Centre and SaskEnergy celebrate five years of science literacy outreach program in Saskatchewan

Saskatoon, Saskatchewan, March 1, 2013 – The Saskatchewan Science Centre and SaskEnergy are celebrating five years of the *GO! Science* outreach program at Montgomery School in Saskatoon today. As part of the celebration the Science Centre's *GO! Science* outreach team will be leading students in science demonstrations and workshops throughout the day.

Each year the Science Centre's outreach team visits communities and schools throughout the province thanks to the financial support of SaskEnergy. "Since the *GO! Science* program started five years ago we've reached more than 100,000 young people with fun and engaging workshops, demonstrations and activities across the province." said Saskatchewan Science Centre Executive Director, Sandy Baumgartner.

During the event SaskEnergy representative, Leslie Gosselin, Manager, Advertising & Community Relations confirmed continued support for the program with the presentation of a cheque for \$100,000 for the *GO! Science* outreach program.

"From baking cookies to building pipelines, science is at the heart of modern living. At SaskEnergy we know that investing in *GO! Science* helps satisfy a growing appetite for creative, hands-on science education in Saskatchewan schools. We can't think of a better partner than the Saskatchewan Science Centre to inspire our province's future innovators and future SaskEnergy employees!" said SaskEnergy representative Leslie Gosselin.

The *GO! Science* program brings innovative and engaging science relating programming to schools and community groups across the province.
